

PROTECT YOUR YIELDS WITH CO-OP PRODUCTS

Since the 1930s, the CO-OP® Refinery Complex in Regina has been manufacturing the energy products needed for seeding, harvesting and everything in-between. But that's not all we do. Today, your CO-OP® Agro Centre is home to a growing inventory of high-quality products, including crop inputs, that Co-op manufactures and distributes. Below is a selection of our products:

Glyphosate

A highly concentrated formulation of glyphosate for non-selective weed control in most crop systems.

Pre-seed Burn Down

A glyphosate additive for pre-seed control of herbicide-resistant weeds before canola.

A fast and flexible pre-seed weed control for cereals, soybeans and corn. A key resistance management tool.

Graminicides

A selective post-emergent herbicide for control of annual and perennial grasses in canola, flax and pulses. An excellent option for controlling foxtail barley.

A selective post-emergent herbicide for a broad spectrum of grassy weed control in canola, flax and pulses.

Broadleaf Herbicides

A concentrated broadleaf weed control option.

An easy-to-use broadleaf weed control option for kochia and wild buckwheat in barley, wheat and durum.

An exciting option for control of common broadleaf weeds in wheat and barley.

A post-emergent broadleaf herbicide option in spring wheat, barley, rye and winter wheat.

A post-emergent broadleaf herbicide in spring wheat, barley, rye, oats and flax.

Surfactants

A non-ionic, multi-functional surfactant that helps maximize pesticide performance, reduce drift and improve droplet deposition. Best paired with glyphosate.

A surfactant designed to reduce spray drift and aid in pesticide deposition. Best paired with glufosinate.

Desiccant

A desiccant that delivers a fast and effective dry down for canola, pulses and soybeans.

Fungicide

A broad-spectrum systemic fungicide for control of a wide range of diseases in several crops.
